

6 TIPS FOR TAKING YOUR CAT TO THE VET

1. LEARN TO LOVE THE CARRIER

Get your cat acquainted with their carrier. Make it comfortable, open, accessible. It could become a favorite napping area.

2. GIVE THEM A REGULAR ONCE-OVER

Give your cat regular head-to-tail checkups at home. This will get them used to being handled the way they'll be handled at the vet

3. REMAIN CALM

Keeping your stress levels low will also help calm your cat.

4. JOY RIDES

Acclimate your cat to the car. Start by taking your cat occasionally on short drives.

5. FIND A HAPPY PLACE

When you get to the clinic, leave your cat in the carrier. You can also cover the carrier with a towel or blanket - preferably one that smells like home.

6. REWARD YOUR CAT

Frequently give your cat affection throughout the trip to encourage good behavior. Source: Royal Canin
