

# Fleas & Ticks

## YOUR QUESTIONS ANSWERED

### FLEAS: WHAT DO THEY DO?

Cause harmful diseases like:

- Flea allergy dermatitis
- Anemia
- Tapeworm
- Rickettsiosis

### HOW CAN THEY BE STOPPED?

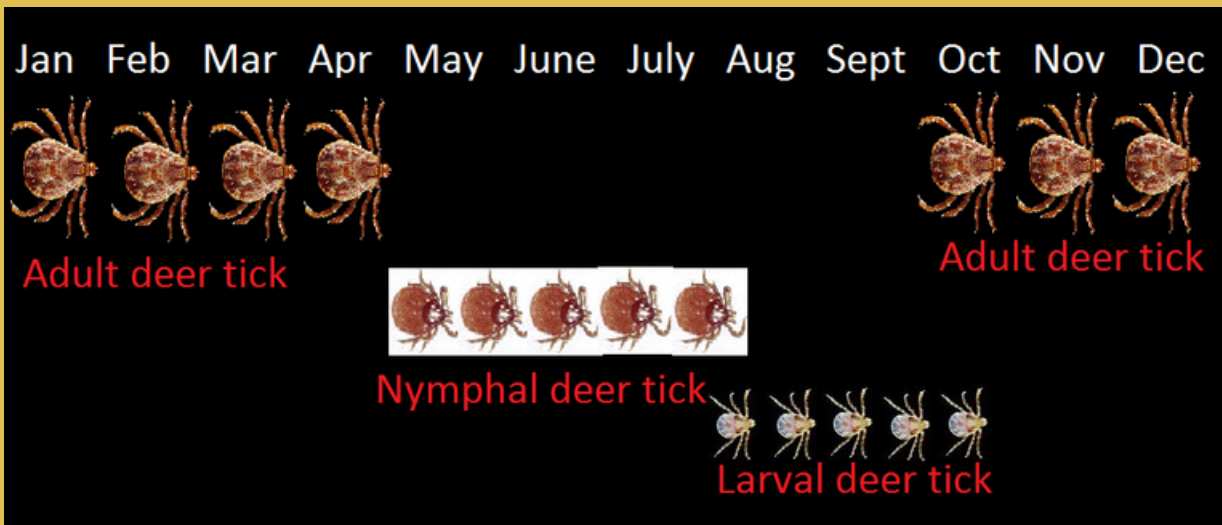

- Periodically, wash your pet's bed cover in hot water and dry it on a high heat setting to kill any flea eggs and larvae.
- Make your yard less appealing to ticks by cutting grass short and eliminating brush piles.
- Vacuum frequently in your home, especially carpets where your pet tends to lounge.
- Cover up all outside crawl spaces and garbage cans to deter wildlife that may carry fleas and ticks.

### TOP TIP

FRONTLINE products prevent infestations by not only killing adult fleas—which comprise only 5% of the total flea population—but also by killing flea eggs and larvae.

WHEN ARE  
THEY  
ACTIVE?

ALL.  
YEAR.  
LONG.

## TICKS: WHAT DO THEY DO?

Cause nasty diseases like:

- Lyme disease
- Rocky mountain spotted fever
- Babesiosis
- Erlichiosis

## WHERE DO THEY LIVE?

Ticks can be nestled in hiding places inside and out without you ever knowing it.

- On other pets and animals
- Around shrubbery and bushes in your backyard where other infested animals such as possums and feral cats frequent.
- In addition, developing stages of fleas may be lurking out of sight in carpets, floors and sofas of your home.
